Insurances.

THE STANDARD.

ENDOWMENT ASSURANCE.

1. AMONG THE MANY ADVANTAGES of this form of Assurance, the following may be mentioned:—

- (a)—It secures an immediate Provision for wife and family or other relatives in event of early death.
- (b)—It provides a Fund for Retirement.
- (c)—It supplies an excellent Investment for the regular accumulation of small fixed sums of money.
- (d)—The Surrender and loan values are larger than under ordinary Policies.

2. AFTER THE POLICY HAS BEEN THREE YEARS IN FORCE—should the Policy-holder wish to discontinue future payments—he will be entitled to receive, on application, a FREE PAID-UP POLICY for a proportionate amount of the Sum Assured, as explained in the Prospectus.

Full particulars on application,
DODWELL, CARLILL & Co.,
Agents,
STANDARD LIFE OFFICE.

PROPRIETORS.....THE HONGKONG HOTEL COMPANY, LIMITED.

THE HONGKONG HOTEL—the most commodious and best appointed Hotel in the Far East, affords unequalled accommodation to travellers and others. It is situated in the centre of the town, opposite the General Post Office and the Hongkong Club, adjacent to Pedder's Wharf (the principal landing stage of the Colony) and in close proximity to the Banks and Shipping Offices.

THE HOTEL STEAM LAUNCH conveys passengers and baggage to and from all Mail Steamers. THE TABLE D'HOTE, at separate tables, is supplied with every delicacy, the cooking being under experienced supervision.

THE BED-ROOMS, with adjoining Bath-rooms, are lofty and well ventilated, open on to spacious Verandahs, are lighted by gas and fitted throughout with electric communications. The Reading, Writing and Smoking Rooms, Ladies' Drawing Rooms, the new, Bar and public BILLIARD ROOMS (Six English and American Tables) are fitted with every convenience. THE WINES & SPIRITS are selected by an Expert and the BEST BRANDS only are supplied. HYDRAULIC ASCENDING-ROOMS of the latest and most approved type convey passengers and baggage from the Entrance Hall to each of the five floors above.

NIGHT PORTERS and WATCHMEN are continually on duty.

DEATH.

On the 23rd December, 1893, at Plover, Essex, of bronchitis and asthma, after a few days' illness, HENRY ANDREW MYLNE, formerly of China, in his 53rd year.

The Hongkong Telegraph.

HONGKONG, FRIDAY, FEBRUARY 9, 1894.

TELEGRAMS.

THE U. S. TARIFF BILL.

LONDON, February 4th.
The United States Senate have referred the Tariff Bill to the Finance Committee.

THE PARISH COUNCILS BILL IN THE LORDS.

The debate in the House of Lords on the Parish Councils Bill resulted in several amendments being carried, generally tending to increase the powers of the Councils.

SOCIALISM IN LONDON.

A free fight has taken place in Trinity Square between the Police and Socialists, mostly German Jews, in which many of the latter were injured by the police's batons.

VAILLANT GUILLOTINED.

February 5th.

Vaillant, who threw the bomb in the French Chamber, has been guillotined in Paris.

RUSSIA AND GERMANY.

The Commercial Treaty between Russia and Germany has been ratified. It provides for a reduction of German duties on grain and petroleum.

The Emperor of Germany, at the Parliamentary dinner, in referring to the treaty insisted on the necessity of its ratification, as otherwise a tariff war might have ensued possibly leading to actual war.

SERIOUS NEWS FROM WEST AFRICA.

A telegram from Sierra Leone reports that the French have again made an attack upon the British force, killing five frontier police. Three Frenchmen were killed.

February 6th.

An official telegram from Sierra Leone confirms the report of an encounter between French and British troops, and adds that several fatal casualties had occurred on both sides. The French flag has been hoisted at Cavalley, on the borders of Liberia.

THE SIERRA LEONE BLUNDERS.

February 7th.

The French and English press alike deplore the unfortunate collisions at Sierra Leone, and urge the necessity for very careful avoidance of such dangerous incidents in the future.

BI-METALLIC MEETING AT MANCHESTER.

At a meeting of the Bi-metallic League at Manchester Mr. David Miller Barbour stated that he is convinced that a transitional agreement is the only possible settlement of the currency question.

The meeting was unable to agree as to whether the experiment tried in India was a failure or otherwise, but in any case India has the gravest financial situation to face.

LOCAL AND GENERAL.

SWALL-POX is reported to exist in the Straits, at Malacca in particular.

The German cruiser *Sperber* left Singapore for Colombo on the 11th ult.

H.M.S. *Severn* was to have left Singapore for a cruise on or about the 1st inst.

The E. & A. Co.'s Australian liner *Mammoth* is due here from the Antipodes to-morrow, the 10th inst.

The Nippon Yusen Kaisha Co.'s steamer *Atsuta Maru* left Singapore for this port yesterday, and is due here on or about the 14th inst.

THE P. M. S. S. Co.'s steamer *City of Peking*, with mails, &c., from San Francisco to the 18th ult., has arrived at Yokohama, and will leave for this port to-morrow morning.

AN Emergency meeting of Zetland Lodge, No. 525, will be held in Freemasons' Hall, Zetland Street, on Monday, the 12th inst., at 7.30 p.m. precisely. Visiting brethren are cordially invited.

THE Agents (Messrs. Dodwell, Carill & Co.) inform us that the Northern Pacific Steamship Co.'s steamer *Mogul* left Victoria, B.C., for this port, via Japan, on the 7th inst., and that the ship's cargo steamer at Tacoma reached New York on the 7th.

THE Shanghai Taotai notifies the dealers in raw and manufactured silk at that port that in consequence of an invitation by the French Government to Chinese silk merchants to send their wares for exhibition to the Lyons Exposition this year, persons desirous of accepting the invitation will be permitted to ship their articles to Lyons free of Customs duty.

ACCORDING to Chinese advisers from Tientsin, Yang, Taotai, the rich official and "stand-by" of the Viceroy, who some years ago was Treasurer of the Board of Revenue, from which he was transferred by Li Hung-chang to take charge of the North-China Railway Company, has been attacked with paralysis. The Viceroy Li is reported to be quite anxious for his opulent protégé.

WE would remind our readers of the concert in aid of the Alice Memorial and Netherland Hospital, which will be held in the Theatre Royal, City Hall, to-morrow night. Special arrangements have been made in the Theatre to improve its acoustic properties, at considerable trouble and expense, which should tend to give the vocalists opportunities of being heard at their best. The whole of the seats in the dress circle have already been booked, so that those who intend being present had better lose no time in securing places in the stalls, by applying at Messrs W. Robinson & Co.'s, Hongkong Hotel Building.

DESCRIPTIVE of the surroundings of the recent Race Meeting in that colony. A Penang contemporary thusly:—"Perhaps the most prominent feature of these two days' racing was the contempt which the Acting Governor showed for the spectators and the tremendous number of police present. Headed by the Superintendent, Mr. Ricardo, our faithful guardian of the peace, some 100 police and some in fancy costume, very efficiently managed to uphold the *Gambling Ordinance*, and nobody not being a member of the Club, or a friend of a member, or a friend of that friend, could flatter a note without having his name taken down. The moral status of Penang, as exhibited during these two days, is a picture for India and the East generally to copy; no bookmakers, no spectators, no cheering, except the totalitator, and this as a piece of mechanism worked wonderfully, and was a source of admiration to all winners. It is needless to add that the various bars were a source of great attraction, and were conducted on the same moral lines that distinguished the racing."

THE final accounts presented by the liquidators of the New Shanghai Electric Co., Ltd., were duly passed by the 20th ult. The Chairman, Mr. R. M. Campbell, in moving the resolution, said he was sorry this was probably the last time they should meet together as shareholders in the Electric Company, because the results would show that instead of selling a 'dead horse' to the Council, as they had been accused of doing, they had sold a very live horse indeed. The liquidation accounts for some days and he trusted they were satisfied with them. They would see that the Working Account, the Profit and Loss Account and the Balance Sheet were made up to Aug. 31st, 1893. He had told them at the last meeting that the expenses of the Liquidators would probably cover the expenses of the liquidation, and it would now be seen that the amount had covered all the expenses including the Directors' fees, &c. He trusted the shareholders would consider that the liquidation had been satisfactorily carried out, and not in an extravagant manner. If anyone had any remarks to make or questions to ask about the accounts, he would be glad to hear them. No questions were asked.

A REGULAR meeting of Perseverance Lodge, No. 1165, E.C., will be held in Freemasons' Hall, Zetland Street, on Friday, the 16th inst., at 8.30 for 9 p.m. precisely. Visiting brethren are cordially invited.

A HOME paper states that the battleship *Agincourt*, which has undergone extensive repairs in Chatham Dockyard, at an expenditure of upwards of £50,000, is being prepared to proceed to China, where she is intended to relieve the *Victor Emmanuel*, old line-of-battle ship, at Hongkong which is unfit for further service. During the time the *Agincourt* has been under repairs she has been supplied with new boilers, and also furnished with a new armament. Notwithstanding the length of the absence, she was still, the hull of the *Agincourt* is in an excellent state of preservation, while the vessel is in all respects fitted for a further long period of service.

At the Police Court this morning before Mr. Hastings, twelve Chinese boarding-house runners and others, who were arrested yesterday at the late fight in Queen's Road, were charged with fighting and creating a disturbance in a public thoroughfare. All the defendants admitted the fact, excepting the alleged ringleader, who was defended by Mr. G. J. Phillips, barrister-at-law. As the evidence showed that the last named instigated the row by snatching a Chinese passenger's baggage from an opposition runner the previous day, his Worship fined him \$10, letting the others off with a penalty of \$3 each. Mr. Phillips objected to the decision as regarded his client, asserting that the magistrate had gone beyond his powers. His Worship retorted that the learned counsel must have forgotten himself, and in response to the observation from the representative of the bar, added that Mr. Phillips owed the Bench an apology and until that was tendered he would decline to hear him further, now or at any other time. Mr. Phillips promptly expressed regret and left the court; but with all due respect to the magistrate's better judgment, and quite upholding him in maintaining the dignity of his position, we beg leave to doubt his possessing any authority to prevent a properly admitted barrister or solicitor from practising his profession in the Police Court.

ATHLETICS IN THE TROPICS.

A meeting of the Hongkong "Odd Volumes" was held in the chambers, Bank Buildings, yesterday afternoon. Sir William Robinson presided, and among those present were Lady Robinson, the Hon. T. H. Whitehead, Mr. J. J. Francis, Q.C., and Mrs. Francis, and many others.

The Chairman briefly requested Dr. Cantlie to address the meeting on the subject of "Athletics in the Tropics." Dr. Cantlie, after expressing regret at the almost total loss of his voice, which he was afraid might not last out the allotted hour-and-a-quarter, went on to recapitulate the main points of a previous lecture, in which he had shown the necessity of athletic exercise for Europeans in the tropics. Why should not Europeans follow the practice of the Chinese and Indians, who regarded physical effort as degrading? Simply because, and as he had shown previously in detail, the physique of Europeans was liable to decline. "Physique" might be considered a vague term; to be more precise, the lung measurement grew less, respirations diminished by three per minute, and pulsations by two and a half per minute, as was proved by several thousands of carefully recorded test cases; and the result was that the body was not so fit, but he seriously impaired. The question arose—what form should athletics take here, and to what extent should they go? Walking exercise was the foundation of everything; without it there could be no good rowing, boxing, football, cricket, or even tennis. Cricket alone was no perfect exercise in any single form. Walking therefore being the first essential, what should be the amount? Some might say "Just walk till you feel tired," but there are many persons who are tired before they begin—who are born tired in fact—(laughter)—while others again, the most fit feeling, would find that as they walked more it was easier, and not so, on the feelings would bring about the same result as with the Chinaman or the Malay—sliding down all the time! (Laughter.) "It is much more comfortable to sit down," they say, but thereby the body is enfeebled. So it is necessary to decide on a fixed amount, approximately at any rate. The body has a certain amount of energy to expend somehow, and that amount can be scientifically determined; in round figures, for a man of average size three hundred foot-pounds of energy per day must be used in muscular force—i.e., energy equal to the lifting of 300 tons weight to a height of one foot during 24 hours. This amount is made up from statistics based on a scientific examination of the human body, as explained in the previous lecture; and all the authorities were pretty well agreed on the point. There was no reason why the tropics should be any less healthy than any other part of the world, except where the sanitation was bad; it was not in Hongkong, of course, but simply perfect (laughter)—and in many tropical places the figures showed a lower death-rate among parents (where the records were) as against children than in the United Kingdom. This proved that the mere temperature was no danger to health, nor any reason why Europeans should adopt the native custom of avoiding exertion in hot countries. A simple mathematical calculation showed that an average man would need 17 foot-pounds of energy in walking a mile, which would necessitate 18 miles of walking to attain the total of 300. That, however, meant a lot of time, which could not be spared except under the eight-hours' labour day. (Laughter.) However, there were many persons who made up the amount by other means—by riding, by rowing, by swimming, by climbing, by all sorts of things, but the fact was that the body was enfeebled. So it is necessary to decide on a fixed amount, approximately at any rate. The body has a certain amount of energy to expend somehow, and that amount can be scientifically determined; in round figures, for a man of average size three hundred foot-pounds of energy per day must be used in muscular force—i.e., energy equal to the lifting of 300 tons weight to a height of one foot during 24 hours. ROME, January 7th.

A crowd of workmen to-night assembled in the Transverberation square and shouting "Long live socialism!" "Long live Sicilian martyrs!" The police were on guard at the passage of the Garibaldi bridge and ordered the crowd to disperse, but the mob opened fire on the police with revolvers, and during the riot which followed a policeman was stabbed with a dagger. Finally the police succeeded in dispersing the crowd and in capturing the two red flags and two anarchists.

Hand-bills were yesterday evening thrown about from the galleries of the theatres inscribed "Down with the people's enemies and taxes!" "Long live the Sicilian martyrs!" Several anarchists who threw the hand-bills were arrested.

A mob yesterday evening attacked and dispersed a Corporal for refusing to join in sedition, and afterwards brutally beat with cudgels some gendarmes. A sharp conflict followed between the police and the rioters, ending in the dispersal of the mob. Four arrests were made, and two gendarmes were injured.

A manifesto signed by several socialist Deputies has been circulated at Modena. It calls the Deputies to take up arms to force the Government to restore peace. The socialist Deputies call on the people to organize popular meetings throughout Italy in order to protest against the "designed violence of the Government and to check the vain resistance of our oppressed brothers," and exhorting them to harbour their strength for future needs.

A dispatch from Palermo says that General Laviano, the military commander there, has issued a proclamation to the Sicilian people, desiring to reassure the peaceful majority of the population, and intimating that he is preparing to strike a speedy and decisive blow at the agitators. The General appeals for aid to all good citizens in suppressing disturbances.

Preparations for the Consistory, which will probably meet in the beginning of March, are already proceeding. It is now stated that it will provide for six new Cardinals, namely, Jacobini, Papi Nuncio at Lisbon; Nicola Secretary of the Consistorial Congregation; Satalini, Papal Delegate to the United States; Fauti, Papal Auditor; Salvati, Secretary of the Congregation Council; and Father Slemminger, a Jesuit.

NEW YORK, January 7th.

The Herald's dispatch from Ottawa, Ontario, says: Earl Aberdeen today received an official dispatch from Lord Ripon, Colonial Secretary of State, notifying the Canadian Government that Her Majesty's Government has agreed with the Government of Russia for a renewal of the *modus vivendi* in the matter of the Behring Sea fisheries until further notice on the understanding that vessels of the United States are subject to similar restrictions.

BOSTON (Mass.), January 7th.

Ben Benton has received news that, if true, will create a genuine sensation in pugilistic circles.

In an interview to-night he said: "The news is to the effect that Peter Jackson's fighting days are over. My informant is a man who ought to be well-versed. He says that Jackson is almost a physical wreck. He has been on the sick list for some time and at present is so bad that he is almost incapacitated for sparring. It has required much coaxing several times of late to get him to do his turn in 'Uncle Tom's Cabin.'"

"The truth is that Peter's present condition is the result of dissipation. This covers the last two or three years. The best-peated sporting men have known for some time that Jackson has not been living a quiet, sober life. He has been fast following the footsteps of John L. Sullivan, but his abroad manager, Parson Davies, has been smart enough to keep the fact from the public."

"I am afraid that it cannot be kept secret much longer, the Parson has almost exhausted his resources of excuses, and so many people are getting on to the exact truth it will have to come out."

"As to Jackson fighting Corbett in May or any other time it is simply out of the question. Peter will never fight Corbett or any one else again. You can depend on this, no matter what you hear. Denials will come, but do not be surprised if you hear any moment that Jackson has completely collapsed and is not able to spar again, let alone fight."

BERLIN, January 7th.

In reply to the resolutions of the Conservative Association in favor of bimetallism, Chancellor Caprivi acknowledges that recent events in India and the United States have increased the importance of the question, but he adds:

"I am still of the opinion that the methods proposed either for the restoration of silver have proved impracticable, and I have good grounds for believing that if renewed attempts were set on foot for common deliberations between the great governments of the world on this subject they would at present be unsuccessful. I am inclined, therefore, in addition to the official inquiry already proceeding, to hear proposals of experts and theorists in the various trades and professions for raising the value of silver, and necessary steps have already been taken to bring about this hearing."

BUENOS AYRES, January 7th.

The Herald's correspondent in Rio Janeiro sends word that a boat from the German warship *Alexandria* was fired on by Government troops at the coal depot on Macaguan Island on December 24th. The commander of the *Alexandria*, after consultation with the German Minister in Rio, demanded an apology from the Government and a salute to the German flag. This apology was given on December 22nd, and the salute was fired by Fort Santa Cruz. The officer in charge of the troops who did the original firing was dismissed.

This action of the Germans is considered to be proof of their perfect neutrality and of their determination to let neither side take liberties with the German flag.

Some curious actions are reported on the part of Pelé's officers. Some of them are certainly either aiding the rebels actively or shutting their eyes most conveniently.

It is reported that last week plans had been laid to capture Admiral Saldanha da Gama, but they were revealed to him by a friend who was an officer in the National Guard. The officer was shot by order of General Telles when his act was discovered.

Considerable gratification is displayed in Rio by Americans who dislike Captain Vicking at the prospect that he will no longer be in charge of the squadron here when Rear Admiral Benham arrives.

The rebel ships *Tamandara* and *Tijofana* are now anchored well over toward Niteroy to avoid the guns of Fort St. John and Lage. They only want to fight with the "Niteroy" batteries now. The *Tijofana* and other rebel ships have been inactive for several days, and the firing upon the Rio shore-line has been confined to launches and torpedo-boats.

LONDON, January 8th.

A heavy fog was on the Channel all day. The steamer *Paris* lost three blades of her screw yesterday while entering Calais and was towed from Calais to Dover.

The British steamer *Erk*, with cargo of Lovonston, last night during the fog struck the Spanish steamer *Alfonso*, one laden and towed from Bilbao for Marseilles.

STEAMER SANK, STERN FIRST, IN A FEW MINUTES.

Twenty-two of the crew were rescued, but two were drowned. The *Erk* was badly damaged. A note from Byron Selwyn, late Belgian Minister to Rome, to the Secretary of State for Foreign Affairs, dated November 23rd last, has been made public. It says Belgium had received a dispatch from the State Department at Washington saying the President did not feel called upon, under the circumstances, to ask that the monetary conference be convoked.

ROME, January 8th.

Rev. Father Ursio of the Church of St. Lucia and the sacristan of that church, arrested on Saturday, with the priest's sister and nephew, on suspicion of being connected with the revolutionists, and subsequently released on the ground that the thousand or more letters found at their residences had been confided to them, they being supposed to be ignorant of their contents, were re-arrested this morning.

BERLIN, January 8th.

News received from the Gold Coast says that there has been a fresh revolt in the Cameroons. The black troops of the German soldiers camped at Nkhot, where the German soldiers camped from the colony. The blacks looted all the factories and buildings. The German fugitives escaped by taking refuge on board the steamer *Brindaba*.

RIO JANEIRO, January 8th.

It is reported that Mello has left Santa Catharina to operate with General Saravia, one of the chiefs of the insurgents, intending to attack Parana and then bombard the harbour of Santos. Admiral Gama is still in Rio bay and confident of success. A serious engagement is expected shortly at Niteroy, where the Government has assembled a large number of troops. Five last torpedo boats, purchased for Piratini in Germany, have arrived at Las Palmas and will immediately join the fleet at Pernambuco.

Peloto is personally directing the assembling of the fleet and calculates to crush the rebellion. A spy of the rebels lately captured in Rio had on his person documents showing where the insurgents obtain their supplies. After confessing everything the spy was taken out and shot.

MELBOURNE, January 8th.

Jones, the haggard man of Victoria, has committed suicide. He was not willing to execute Mrs. Knorr, a woman sentenced to death for causing the deaths of infants at her "baby farm."

CAPE TOWN, January 8th.

A dispatch from Palapye reports that fifteen Bechuanaland policemen were killed recently during a dark night, near Ixoyt. There are no further details.

NEW YORK, January 9th.

A Herald dispatch from Managua, Nicaragua, says: Nicaraguan invaders of Honduras have won another important victory. General Ortiz captured the town of Nacacoma this afternoon. Nacacoma is in the province of Chinotica, and is situated not far from the city of that name.

LATE TELEGRAMS.

LONDON, January 8th.

The Duke and Duchess of York promise to make every effort to visit the colonies in 1895. The United States Labour Federation reports that three millions of men are out of work as the result of strikes, and recommends in future the entire abolition of strikes as a method of raising wages.

Severe weather is being experienced throughout Europe. Fifty people were frozen to death near Vienna.

January 8th.

Count Chapelle is suing General and Mrs. Browne at Nice for libel. The Count says the accused described him to a master of ceremonies at a public ball at Melbourne as an escaped convict from New Caledonia.

Intense cold is being experienced. The Thames is frozen over. The traffic on the railways is impeded with snow and ice.

The British Government workshops have introduced the eight-hour system.

Monaghan, who was recently tried for the murder of Lord, Hambrough, says that Scott did not go to West Australia. He believes he is still in London, and living under the name of Sweeney. Hambrough owed Sweeney large sums for betting transactions. Sweeney went to Ardnamont to endeavour to get a settlement.

January 8th.

The Pope has addressed to the Catholics of France a special Allocution urging the united efforts of all orders of society against the Socialists, who are seeking to upset the Government.

Cecil Rhodes reports that the Matabele war is over. The insurance has been entirely suppressed by the militia locally raised by private people. The British public are doubtful whether it is politic to permit private trading companies to carry on wars in this irresponsible manner.

Further advice are to be heard from Sierra Leone. One report says that considerable jealousy existed between the British and French forces regarding their respective spheres of influence. Both parties were burying to scold of particular strategy point for the purpose of operating against the Gola tribe, when the French mistook the British white uniforms for Arab clothing, and fired. After fighting had become general the mistake was discovered, and efforts to withdraw the troops were made; but the British rank and file, consisting of the troops recruited in the West India Islands, continued fighting and drove the French before them. The French leader, who was mortally wounded, died in the British camp.

Viscount Deerebury, some years ago made a tour of the Australian Colonies, engaged to be married to Miss Victoria Borge.

January 9th.

Mr. Cecil Rhodes, the Premier of Cape Colony, speaking at a banquet at Cape Town, stated that, if the Imperial Government failed to recognize its duties to the colonies, and in particular to South Africa in connection with the Matabele trouble, the colonies might feel it incumbent on them to deal elsewhere. The London *Daily News*, commenting on the speech, asserts that it is incumbent on the Marquis of Ripon, Secretary of State for the Colonies, to try to fairly safeguard the future interests of Matabeleland, and to him to attempt to do more than this would be to wound the susceptibilities of British subjects in South Africa and run the risk of losing Cape Colony.

At the instance of the extreme Democrats in the House of Representatives in the United States, action is being taken in order that members belonging to either party who may absent themselves without leave shall be liable to be arrested and compelled to attend the sittings of the Chamber. This step, it is alleged, has been suggested in order to secure the quorum necessary to carry on the work of revising the tariff.

The Republicans are threatening to take steps for the impeachment of President Cleveland, owing to his action in regard to Hawaii.

The Brazilian insurgents have succeeded in obtaining possession of the Island of Eugenio, at the mouth of the river of that name to the northward of Bahia. "Tribune" loyalists were killed and ninety-four taken prisoner.

The Agent-General for Victoria is urging upon the authorities of the Imperial Institute to permit the sale of Australian wines in the Institute. New South Wales has presented a great part of the exhibits, recently shown, at Chicago to the Institute.

An Italian deputy representing a trade society at Naples, named *Giacchino*, has been arrested.

The police found upon him papers disclosing a plot for a simultaneous revolt in Sicily, Naples, and Rome. Hundreds of anarchists were arrested immediately, and in effecting the arrests numbers of the police were wounded.

January 10th.

Serious riots are taking place along the Adriatic coast of Italy. Troops have been called out in many towns; the popular feeling is strongly excited against the Government and favours a strong anti-French Customs tariff.

January 11th.

A man named French and his wife, confessed to being associated with anarchist plots at Barcelona. At one time, they say, arrangements were completed for the destruction of the city, but were not carried out owing to dissensions.

The widow of Thackeray, the novelist, is dead.

Russia is spending 50 million roubles on strengthening the Navy.

SIAM NOTES.

Bangkok, January 30th, 1894.

For the first time since last April there were no European patients in the Bangkok Hospital yesterday.

Visitors to Paknam are hereby warned that the hotel there has been closed, and in future they will need to take their own whisky down. We learn that the *Medusa* and another "blue-funnel" steamer were quarantined for some hours on their arrival in Singapore last week, owing to the existence of small-pox in this port.

Mr. Little of the *Star Free Press* has given notice of appeal against the verdict of the jury in the recent Gelat libel case. Leave was granted yesterday on condition that security for \$1,100—to cover damages and costs—was forthcoming.

A correspondent writes, in reference to our remarks regarding the value of Luning Phrabang, France as a trade centre, that for upwards of twenty years British traders—that is to say, Burmese—have been established there and there are more British subjects in Luning Phrabang to-day than there are French subjects in Bangkok.

The reluctance of one of the consignees to claim a quantity of merchandise brought up by the *Monkfish* having excited the suspicions of Mr. van Cuylenburg, the Optician Firm's Inspector, the goods were examined on Saturday, and twenty tins of opium discovered. This is the third important seizure in one month—sign that the smuggling industry is being revived.

—*Siam Observer*.
